### Message from the Guest Editors

This Special Issue aims to combine the contributions of research groups working all over the world in the fields of phylodynamics, evolutionary genetics, population genetics, DNA barcoding, conservation genetics, molecular epidemiology, and molecular taxonomy, with the aim of collating a group of original papers that highlight the importance of studying the genetic variability of organisms for the protection of all species.

The first volume of this Special Issue was a great success. Now, we invite you to publish in the second volume.
