Membranous and Membraneless Interfaces—Origins of Artificial Cellular Complexity

Guest Editors:

Prof. Pasquale Stano

Department of Biological and Environmental Sciences and Technologies (DiSTeBA), University of Salento, Lecce, Italy

Prof. Dr. Kanta Tsumoto

Division of Chemistry for Materials, Graduate School of Engineering, Mie University, Tsu 514-8507, Japan

Deadline for manuscript submissions:

closed (31 May 2022)

Message from the Guest Editors

This Special Issue aims at collecting the most recent studies on artificial systems based on different types of compartmentalization. The final goal is the understanding of inter-cellular and intra-cellular mechanisms that contribute to the development of cellular complexity, revealing “emergent” properties occurring in cell and protocell systems. The Special Issue also includes research presentations on related experimental/theoretical investigations; thus, let us think deeply about how (proto)cells could emerge as molecular microcompartment systems that developed their own interfaces.

We would like to elicit the submission of articles (full articles, reviews, etc.) related to the broad subject of membrane and membraneless microcompartments, their physico-chemical features, their use as cell or organellae models and, in general, about the peculiar characteristics of compartment architectures. All types of approaches are welcome (experimental, theoretical, conceptual, numerical simulations, etc.).

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
