Functional and Morphological Adaptations in Insects

Guest Editors:

Dr. Federica Talarico

Natural History Museum and
Botanical garden, University of
Calabria, Via Pietro Bucci, 87036
Arcavacata di Rende, CS, Italy

Dr. Anita Giglio

Department of Biology, Ecology
and Earth Science, University of
Calabria, 87036 Rende, Italy

Deadline for manuscript
submissions:

closed (30 June 2022)

Message from the Guest Editors

The widespread distribution of insects over many aquatic and terrestrial environments is the evidence of their evolutionary success. Insects have evolved complex and effective behavioural, morphological and physiological adaptations to face a multitude of selective pressures. Their diversity is readily recognizable through morphological features, and their abundance and ability to occupy a wide range of ecological niches can be attributed to adaptations of both external structures and internal physiology.

Biotic and abiotic factors influence diverse morphological features and biological characteristics related to the life history traits of species such as reproduction, sexual selection, growth and development, body size, feeding habits, life cycle regulation, prey-predator relationship, homeostasis and pathogen resistance.

The goal of this Special Issue is to collect research and review papers covering the physiological, morphological and behavioural aspects of Insects.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q2 (*Paleontology*)
