### **Message from the Guest Editors**

SARS-CoV-2 is the RNA virus behind the COVID-19 pandemic that has been threatening global health since December 2019. HIV-1 is also an RNA virus which causes acquired immune deficiency (AIDS). It was first identified in 1983 and despite 38 years of research, eradication of HIV-1 remains elusive. With this background in mind: what are the consequences of the co-infection HIV-1 and SARS-CoV-2 and how can we explore them? Whilst SARS-CoV-2 research has been fast and it has benefited from having the latest technical advances, HIV-1 research has been gradually improving with the great scientific developments of the last decades. We invite review and original papers describing advances in methodology and new knowledge concerning immunology, epidemiology, and pathogenesis of those two viruses. What can SARS-CoV-2 research learn from HIV-1 advances and vice versa? How can this newly acquired knowledge improve the life condition of SARS-CoV-2 and HIV-1 mono and co-infected individuals?

Deadline for manuscript  
submissions:

**closed (30 June 2022)**

## Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Biology*) / CiteScore - Q2 (*Paleontology*)
