Deadline for manuscript
submissions:
closed (31 October 2023)

Message from the Guest Editors

Dear Colleagues,

With continuous innovations and advancements in analytical instruments and computer technology, omics studies based on statistical analysis, such as phytochemical omics, oilomics/ lipidomics, proteomics, glycomics, flavoromics and metabolomics are increasingly popular in the areas of food chemistry and nutrition science. Smart algorithms and machine/deep learning, i.e., genetic algorithm (GA) optimization, random forest classification, logistic regression, and convolutional neural networks (CNN) are emerging data science approaches that have been widely developed to rapidly analyze multidimensional omics datasets from online sensors or offline analytical instruments. Although clearly designed roadmaps that permit the next generation development in the context of Agri-Food 4.0 are still being worked out, this challenging scenario in the Nutrition and Agri-Food Science Technology (NAFST) provides an opportunity for wide-ranging discussions.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
