Deadline for manuscript submissions:

closed (31 July 2025)

Message from the Guest Editor

Dear Colleagues,

The last several decades have brought about many advances in the diagnosis, treatment, and prognosis of gastrointestinal diseases. In this Special "Gastrointestinal Diseases: Innovations in Diagnostics, Therapeutics, and Prognosis", we aim to focus on new innovative articles that showcase new diagnostic tools and methods for detecting all types of gastrointestinal tract diseases. We will explore the use of artificial intelligence and machine learning algorithms for the analysis of medical images and the identification of early signs of cancer and other gastrointestinal diseases. Additionally, we aim to combine these methods with clinical examination. which is the most important aspect of patient treatment. Our goal is to highlight new methods in the field of gastrointestinal diseases, as well as specific clinical cases from practice.

We look forward to receiving your submissions.

Dr. L'udovít Danihel Guest Editor

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
