Dear Colleagues,

Horizontal gene transfer is an important process in modern biological systems, resulting in the spread of resistance genes among pathogens, and even gene sets for metabolic processes. There is also good evidence for ancient horizontal gene transfer events, indicating that the evolutionary history of genes within genomes is best understood in terms of networks. This Special Issue invites contributions that consider the extent to which horizontal gene transfer contributed to the early evolution of life on Earth.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: [JCR - Q2 \(Biology\)](#)
