Message from the Guest Editors

Dear Colleagues,

The present Special Issue, edited by Professor David Deamer and Dr. Bruce Damer, will focus on processes by which organic compounds and products of prebiotic polymerization reactions can undergo self-assembly into encapsulated systems. These systems are referred to as protocells, and are capable of energy-dependent polymerization processes, as well as growth of their membranous boundaries. Such systems are now at the cutting edge of current research, with a real potential to become the first form of artificial life to be demonstrated in the laboratory.

Prof. Dr. David Deamer

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
