Special Issue

Advances in Endovascular Therapies and Acute Stroke Management

Message from the Guest Editor

This Special Issue explores the latest innovations and clinical advancements in endovascular medicine for acute stroke care. These therapies have revolutionized stroke management, enabling minimally invasive interventions that restore blood flow and improve outcomes. The scope includes:

- Endovascular Techniques: Advances in thrombectomy devices and aspiration catheters.
- Imaging and Biomarkers: CT, MRI, and angiography for selection and evaluation.
- Emerging Technologies: Tools and strategies enhancing reperfusion outcomes.
- Therapy Integration: Combining endovascular and systemic treatments.
- Clinical Strategies: Multidisciplinary workflows to reduce delays and improve access.
- Patient Outcomes: Assessing recovery, recurrence prevention, and quality of life.

We welcome submissions that advance endovascular stroke therapies, highlight collaborations, and present future directions in acute stroke care.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
