Clinical Trends and Novel Research Insights in Testicular and Penile Disorders and Infertility

Message from the Guest Editor

Disorders that affect the external male genitalia are numerous and feature broad-spectrum entities, ranging from painless to disabling, and from benign to malignant. The extraordinary heterogeneity in terms of pathobiology, epidemiological trends, clinical presentation, and severity coupled with the diversity of available preventive and curative approaches, treatment effectiveness, potential complications, and adverse effects shape the complex and intriguing scientific and practical landscape in this constantly evolving area of urology.

This Special Issue will collate high-quality fundamental, clinical and translational research, as well as in-depth reviews, aiming to foster debate on new scientific insights, clinical trends, current challenges, and future perspectives compliant with this comprehensive topic.

Guest Editor

Dr. Uroš Bumbaširević

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
