Chronic Low Back Pain: Symptoms, Pain Mechanisms and Treatment

Message from the Guest Editor

Chronic low back pain (CLBP) is the most frequently reported cause of years lived with disability. In general, three categories of presumptive pain mechanisms can be defined: non-degenerative CLBP (trauma, tumor, inflammation, and infection); degenerative CLBP (non-specific CLBP); and CLBP of unknown origin. Degenerative CLBP can originate from the discs, facet joints (or both), ligaments, regional or global disorders of spinal balance and muscles, tendons, nervous tissue and sacroiliac joint degeneration. The diagnosis mainly relies on medical history, clinical examination, medical imaging, and the consideration of differential diagnoses. In most cases, no clear pain source can be identified. In this Special Issue, we will focus on degenerative CLBP. In the diagnostic work, we will try to identify the structures that cause the pain. For each diagnosis, the potential treatment schedule will be described. The selection of interventional pain management procedures and surgery will be discussed, providing a balance between expected outcomes and potential side effects and complications.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
