Research and Management in Autoimmune Rheumatic Diseases

Message from the Guest Editor

Autoimmune rheumatic diseases represent a major problem for physicians and researchers alike. Autoimmune diseases have seen a significant increase in incidence and prevalence all over the world. The etiology behind this augmented prevalence and incidence is not known and poses a major problem for physicians and researchers alike. However, even as autoimmune rheumatic diseases are increasing in prevalence and incidence, novel therapeutic agents are becoming available. These agents offer new hope for successful treatment and better prognosis for patients and physicians alike. In particular, biologic agents have had a major impact on the treatment of autoimmune rheumatic diseases. JAK inhibitors also offer hope for treatment and better quality of life in patients. Recently, cell-based therapies such as CAR-T cell treatment have become part of the armamentarium for the treatment of autoimmune rheumatic diseases. Novel research has allowed the identification of major pathways involved in the pathogenesis of autoimmune rheumatic diseases. For this Special Issue, we welcome any paper related to the pathogenesis or treatment of autoimmune rheumatic diseases.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
