Evolving Concepts in Respiratory Disorders: From Molecular Mechanisms to Novel Insights in Diagnosis and Management of Concurrent Comorbid Condition

Message from the Guest Editors

Mortality from respiratory disease is constantly increasing year after year representing today the third main cause of death worldwide. Although many steps forward have been made in the comprehension of chronic respiratory disorders, expanding the knowledge about the molecular mechanisms as well as the development and identification of new biomarkers that can help in early diagnosis is an urgent matter that without any doubt would improve their specific treatment.

In this Special Issue, we would like to include research articles that could provide a step forward in the comprehension of the molecular mechanisms underlying all lung diseases such as lung cancer, cystic fibrosis, chronic obstructive pulmonary disease (COPD), asthma, interstitial lung diseases (ILDs), and others. Furthermore, we welcome research articles that could provide an advance in the understanding of the connection between lung pathologies and the recurrent comorbid conditions associated. We also welcome reviews with the aim to keep the readers up to date on the most recent advances in the field.

Guest Editors

Dr. Filippo Scialò

Dr. Fabio Perrotta

Dr. Monica Gelzo

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
