New Insights into Diagnosis and Therapeutic Strategies for Chronic Liver Diseases

Message from the Guest Editor

Chronic liver diseases (CLDs) have emerged as a significant cause of hepatic-related morbidity and mortality worldwide in recent years. MASLD is a complex pathology, and is considered to be the hepatic expression of metabolic syndrome (MetS). We welcome the submission of articles that highlight new insights into the pathophysiologic mechanisms of CLDs and examine novel pathogenic pathways, new biomarkers, imaging diagnosis tools, and future therapies. In addition, we particularly welcome the submission of articles that analyze the influence of lifestyle and environmental factors on CLD progression. This Special Issue aims to present recent advances in research that enable the early diagnosis and personalized treatment of CLD, thus improving patient outcomes. The dissemination of current research regarding CLDs and collaboration between physicians, gastroenterologists, internists, cardiologists, diabetologists, nutritionists and endocrinologists is also required to ensure that we possess the knowledge and resources necessary to address this public health challenge.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
