Clinical Update for Resuscitation Science

Message from the Guest Editor

Resuscitation science has advanced over the past decade, leading to improved outcomes for critically ill patients with severe acute respiratory or circulatory failure. However, despite these advancements, their outcomes remain poor. For example, the survival rates of patients with cardiac arrest are approximately 10% (varying from 0% to 18%), and even among survivors, many patients are discharged or transferred to other hospitals in a vegetative state or coma. Therefore, there is a need to develop better strategies for the management of such critically ill patients. This Special Issue focuses on any and all critically ill patients who need resuscitative interventions, such as those with severe acute respiratory or circulatory failure, requiring the support of extracorporeal membrane oxygenation, or severe trauma, as well as patients experiencing cardiac arrest. Additionally, we seek to encompass studies related to training and education on resuscitative procedures. This broad scope takes in clinical and basic research, review articles, and case reports related to resuscitation science.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
