Special Issue

Prostate Disease: Pathogenesis, Diagnosis, and Therapy

Message from the Guest Editors

The prostate is an important accessory organ of the male genitourinary tract. The incidence of prostate diseases, including benign prostate hyperplasia and prostate cancer, increase with age. In the last decade, there were great advancements in the management of prostate disease. For example, the diagnosis of prostate cancer evolved from systematic biopsy to MRI-targeted biopsy. Much more attention has been gained in the treatment of early prostate cancer using focal therapy. Novel hormone agents, radium-223, PARP inhibitors, and PSMA-based radionuclide therapy have revolutionized the treatment for metastatic prostate cancer. Technological advances including laser surgery, water vaporization, and arterial embolization also offer safer treatment alternatives for patients with prostate hyperplasia. The Special Issue entitled "Prostate Disease: Pathogenesis, Diagnosis, and Therapy" aims to publish original research articles and review in the field of prostate diseases. The new advances in pathogenesis, diagnosis, and therapy for prostate cancer or benign prostate hyperplasia are highlighted.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
