

Special Issue

Pathogenesis, Pathological Features and Treatment of Sleep Disorders

Message from the Guest Editors

This Special Issue aims to highlight the latest research and advances in the etiology, pathological features, and treatment of sleep disorders. As sleep is essential for human health and well-being, sleep disorders can lead to serious health problems. Recent studies have shown that various sleep disorders are closely associated with cardiovascular diseases, metabolic disorders, mental health problems, and more. Therefore, this Special Issue focuses on deepening our understanding of the pathological mechanisms of sleep disorders and developing effective treatments. We invite manuscripts on etiologic studies of sleep disorders, diagnostic and assessment methods, innovative treatment approaches, and management strategies. With this Special Issue, we hope to promote a multidisciplinary approach to sleep disorders and share new knowledge and strategies that can be of value in patient management.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
