

Special Issue

Cardioncology: From Molecular Mechanisms to Advanced Imaging and New Treatments

Message from the Guest Editors

Advances in cancer therapies have significantly increased patient survival rates, but they carry the risk of cardiotoxicity, which requires effective monitoring and management. The immunological consequences of cancer treatments, especially with new biological therapies such as immunotherapy, underscore the need to explore the role of the immune system in determining cardiotoxicity at the molecular level. This Special Issue invites you to submit review articles or original papers with the aim to:

- Delve into the molecular mechanisms underlying the interplay between cardiovascular and cancer-related issues;
- Delve into the role of advanced imaging techniques in the diagnosis of early cardiotoxicity and monitoring of possible cardiovascular side effects of various classes of chemotherapeutics and radiotherapy;
- Deepen our understanding of the role of serum cardiac biomarkers in the diagnosis of early cardiotoxicity and monitoring of possible cardiovascular side effects of various classes of chemotherapeutics and radiotherapy;
- Delve into arrhythmic complications: diagnosis, monitoring and treatment;
- Describe the latest advances in treatments of cardiotoxicity.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
