

Special Issue

Food and Environmental Toxicology

Message from the Guest Editors

Food and the environment are closely linked. The increasing environmental pollution due to both human activities and natural processes makes it necessary to determine contaminants and assess the risks derived from them. The determination of contaminants such as toxic metals (Al, Cd, Pb, Hg, etc.), trace elements (Fe, Cu, Zn, I, etc.) or even some ions such as nitrates or fluorides in food and environmental samples is important for public health. This Special Issue aims to bring together articles on contaminant content in food and food samples to assess exposure and risks to the population. Priority is given to novel foods and functional foods such as seaweed, plant-based drinks and vegan foods, food supplements, etc.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
