

## Special Issue

# Neuroimaging and Integrative Analyses in Psychiatry and Addictive Disorders

### Message from the Guest Editor

The scope of this issue includes studies on neuroimaging, neural mechanisms, and the identification of biomarkers. Submissions on forensic psychiatry, psychotherapy, and neuropsychiatric disorders such as treatment-resistant depression (TRD), substance use disorder (SUD), and attention-deficit hyperactivity disorder (ADHD) are particularly encouraged, with a focus on evaluating clinical outcomes and correlates of human brain function. Key areas of interest include functional and structural imaging techniques (e.g., fMRI, PET, EEG). Furthermore, translational research linking imaging findings to therapeutic applications, including psychotherapeutic and pharmacological interventions, as well as studies exploring the implementation of artificial intelligence, are also considered.

Multimodal data analyses on imaging genetics, transcriptomics, and computational psychiatry shall highlight emerging trends and unmet needs for personalized medicine, fostering collaboration among researchers, clinicians, and forensic experts. By providing a platform for integrative and multidisciplinary approaches, we aim to advance the understanding of psychiatric and addictive disorders.

---

### Guest Editor

Dr. Arkadiusz Komorowski  
Grüner Kreis Association, Vienna, Austria

---

### Deadline for manuscript submissions

25 October 2025

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
