

Special Issue

Environment and Feed Composition on Animal Health Status

Message from the Guest Editors

This Special Issue of *Life* will publish reviews and original research articles covering the recent research advances in the influence of environmental factors and changes in feed composition on animal health.

Environmental factors may include temperature, humidity, light, noise and stocking density, etc. The changes of feed formulation may mainly involve different levels of protein, fat and carbohydrate, etc. We are particularly interested in studies that strength our understanding of the physiological and biochemical mechanisms of environment and feed composition on growth performance and health status of animals. In addition, the identification of biomarkers for stress caused by alterations of environmental factors and feed composition in animals are welcome.

Guest Editors

Prof. Dr. Xihong Zhou

Institute of Subtropical Agriculture, Chinese Academy of Sciences (CAS), Changsha, China

Dr. Hongbo Yi

Institute of Animal Science, Guangdong Academy of Agricultural Sciences, Guangzhou, China

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
