Special Issue

Placental Spectrum Disorders and Gynecological Oncology

Message from the Guest Editor

The placenta is one of the most common gross pathology specimens encountered by pathologists. Primary tumors are exceptionally rare, and entities with the potential to mimic malignancy are even rarer, but there are many non-neoplastic mass-forming lesions in the placenta that clinicians should be aware of, as many are associated with adverse outcomes for the mother and fetus. A knowledge of these potential pitfalls is essential to avoid making an incorrect diagnosis and causing undue alarm.

In launching this Special Issue, we hope to advance this field by inviting original clinical and basic research articles, meta-analyses, and systematic reviews focusing on tumors linked to the placenta.

The clinicopathological features of placenta lesions in general, along with the comparison of different vascular lesions of the placenta in terms of incidence, risk factors, complications, histologic origin, and macroscopic and light and electron microscopic features remain to be described.

Thus, we welcome the submission of articles focused on the molecular pathways underlying intrauterine diseases, including their potential influence in reproductive issues.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
