Advances in the Rehabilitation of Stroke

Message from the Guest Editor

This Special Issue, *Advances in the Rehabilitation of Stroke*, brings together current research and emerging insights aimed at improving outcomes across the continuum of stroke rehabilitation. It welcomes studies that explore innovative interventions, predictive factors, care models, and outcome measures relevant to the acute, post-acute, and chronic phases of recovery. Topics may include the effectiveness of multidisciplinary rehabilitation programs, functional and cognitive assessments, prognostic indicators, health service utilization, and patient-centered care strategies. Collectively, the contributions to this Special Issue aim to support evidence-based practice and foster interdisciplinary dialogue to advance the field of stroke rehabilitation. In addition, research employing any type of study design that contributes to the current knowledge in this area is encouraged for submission.

Guest Editor

Dr. Chia Huei Lin

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
