Novel Insights into Medical Oncology

Message from the Guest Editor

Oncological disease has an overall increasing incidence and mortality worldwide. Cancer treatments have been the main focus of most researchers and clinicians in order to determine a lower mortality rate. Medical oncology represents one of the most challenging specialties involved in cancer treatment, dealing with very low stages of cancer up to palliative treatments and even end-of-life protocols. This Special Issue is addressed to all researchers aiming to submit their papers in the field of oncology. Original research and reviews are welcome for consideration.
