Hybrid Imaging of Complicated Osteomyelitis in the Central and Peripheral Skeleton

Message from the Guest Editors

FDG-PET combined with CT seems to be the most accurate single modality for imaging COM in the central as well as peripheral skeleton, compared to traditional radionuclide imaging tests. Firstly, PET-CT offers the advantage of locating abnormalities more precisely, and is capable of monitoring treatment response. Secondly, it is an all-in-one technique completed within 2 hours, and the patient dose is lower. Thirdly, it is a robust technique with high interobserver agreement and NPV, excluding COM, with high certainty. Unfortunately, there are still false positives, especially in the early postsurgical period and also in the presence of spinal implants or tibial delayed union, resulting in a lower specificity and PPV. Therefore, the holy grail is still imaging bacteria with specific radiopharmaceuticals, hopefully as a realistic option or an illusion!

In the future, the complementary use of hybrid SPECT and especially radiolabeled compounds for PET-based infection imaging combined with CT or MRI may overcome some of the challenges faced in the assessment of COM.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
