Recent Progress in Animal Tumor Pathology

Message from the Guest Editors

Tumors are the main cause of death in dogs, and generally in companion animals. In the last decade, veterinary oncology has greatly developed in terms of histologic diagnosis, the definition of prognostic markers, and understanding of tumor biological behavior. Many efforts are being made to standardize histologic criteria to make diagnosis much more reproducible. A large and continually increasing number of specific markers are being identified, allowing an earlier and less invasive diagnosis. New advanced therapies, including immune therapies, are being developed thanks to new discoveries about tumor growth and development. All this information is often dispersed in the scientific literature, rendering it difficult to spot the novelties and more recent progress in this field. The goal of this Special Issue is thus to collect, in a single issue, the most advanced research on animal tumor pathology and its application to the benefit of animal health. Dr. Maria Teresa Teresa Mandara

Guest Editors

Dr. Maria Teresa Mandara

Laboratory of Neuropathology, Department of Veterinary Medicine, University of Perugia, 06126 Perugia, Italy

Dr. Sara Belluco

Laboratoire d'Histopathologie, VetAgro Sup, Campus Vétérinaire, 69280 Marcy l'Étoile, France

Deadline for manuscript submissions

closed (20 December 2023)

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
