

## Special Issue

# Pathogenesis, Biomarkers, and Treatments of Skin Diseases

### Message from the Guest Editor

Skin diseases encompass a wide range of conditions with complex pathogenesis involving genetic, environmental, and immunological factors. Understanding the underlying mechanisms has led to the identification of various biomarkers that aid in diagnosis, prognosis, and monitoring of treatment responses. Advances in research have also paved the way for innovative therapies, including targeted biological agents and small molecules to improve patient outcomes. This review summarises current knowledge on the pathogenesis, key biomarkers, and therapeutic strategies for common chronic inflammatory skin diseases, highlighting recent developments and future perspectives in dermatological research and clinical practice.

### Guest Editor

Dr. Annunziata Raimondo

Surgery and Dentistry, Department of Medicine, University of Salerno, Salerno, Italy

### Deadline for manuscript submissions

31 December 2026

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
