Bioactive Natural Compounds: Therapeutic Insights and Applications

Message from the Guest Editor

Plant extracts and other natural products are complex mixtures of natural compounds and they and their metabolites are suitable for a various applications in the fields of pharmaceutics and nutrition. The natural compounds analysed in this Special Issue should include plant phytochemicals and animal products with proven effects. The bioactivity of phytochemicals of plant extracts is essential for their functionality and this bioactivity should be determined through novel and appropriate techniques and assays. Extraction is one of the most important steps in determining the functionality of chemicals of natural origin and different extraction methods and techniques could change composition and bioactive effects of plant extracts, which may also be covered by this Special Issue. Since bioactive compounds extracted from plant material are complex mixtures, their separation and quantitative and qualitative analysis are crucial steps in the structural composition of extracts. Appropriate and novel analytical methods or their validation procedures should be used for publications in this Special Issue.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
