

Special Issue

Autophagy in Cancer: Current Advances and Challenges

Message from the Guest Editor

The recent discoveries on autophagy have highlighted its key role in tumorigenesis, cancer progression and morbidity. Autophagy, acting as a catabolic process, is a double-edged sword in cell survival and its impairment is responsible for cellular alterations, which in turn lead to tumorigenesis. This Special Issue will collect research articles and reviews focusing on the mechanism of autophagy and its involvement in cancer. Recent advances are highly appreciated for submission. Nonetheless, basic, translational, and clinical research studies will be considered for publication in this issue.

Guest Editor

Dr. Pietro Di Fazio

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
