

## Special Issue

# Clinical Advances in Cardiac Arrest: Prognostic Performance and Management

### Message from the Guest Editor

This Special Issue aims to serve as a seminal resource for medical professionals navigating the evolving landscape of cardiac arrest care. Despite advancements in resuscitative science, cardiac arrest continues to be a leading cause of mortality and morbidity around the world. This Special Issue seeks to address this critical gap by focusing on two pivotal aspects: prognostic performance and management strategies. It aims to elucidate the latest predictive models and biomarkers that can accurately forecast patient outcomes following resuscitation. Concurrently, the Special Issue will explore innovative management approaches, from pre-hospital interventions to advanced critical care techniques, that optimize patient survival and neurological function. By amalgamating cutting-edge research and expert opinions, this Special Issue endeavors to enhance clinical decision making and set new benchmarks in cardiac arrest care. The target audience comprises basic researchers, resuscitation scientists, emergency physicians, intensivists, cardiologists, and other healthcare providers who are committed to elevating the standard of care in this life-threatening condition.

### Guest Editor

Dr. Kei Hayashida

Department of Emergency Medicine, Donald and Barbara Zucker School of Medicine at Hofstra/Northwell, Hempstead, NY 11549, USA

### Deadline for manuscript submissions

closed (29 March 2024)

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
