

Special Issue

Pain and Therapy: Historical Perspectives and Future Directions

Message from the Guest Editors

The Special Issue will collect original research articles, reviews, systematic reviews, and meta-analyses on physiological and therapeutic aspects of pain. Papers on innovative aspects and on the various types of pain, i.e., nociceptive, neuropathic, and nociplastic, are welcome. We would like to give particular emphasis to therapies with critical insights on opioids, NSAIDs, and supportive therapies. Finally, nutraceutical remedies of pain are welcome.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.
