Special Issue

Personalized Medicine in Ophthalmic Diseases: Updated Challenges and Opportunities

Message from the Guest Editor

Medical practice in ophthalmology is always advancing. With the continuous development of novel diagnostic and treatment technologies, such as gene therapy, imaging modalities, nanotechnology, and molecular treatment, and by using artificial intelligence, we hope to gain access to a more personalized form of ophthalmic care for our patients. This Special Issue aims to facilitate the understanding of the challenges that ophthalmic diseases present and how they affect each patient, while also providing the opportunity of sharing and discussing recent ophthalmological knowledge in a comprehensive manner. Therefore, we invite you to contribute to this Special Issue with original articles and reviews based on clinical and experimental research. Papers from all subspecialities of ophthalmology are welcome, as they could provide a more personal approach to ophthalmological conditions.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
