Insights into Obstructive Sleep Apnea

Message from the Guest Editor

This Special Issue focuses on Obstructive Sleep Apnea (OSA), a prevalent and chronic disorder characterized by repetitive apneas and hypopneas during sleep. It is associated with increased morbidity and mortality and is considered a potential etiological factor for cardiometabolic diseases such as hypertension, diabetes mellitus, stroke, insulin resistance. Diagnosing OSA is complex, requiring overnight sleep monitoring through polysomnography (PSG). However, PSG alone may not fully demonstrate individual susceptibility to systemic effects. Thus, the inclusion of biomarkers and vascular parameters can improve prognosis prediction and treatment response. Various treatment options for OSAS, including continuous positive airway pressure (CPAP), mandibular advancement devices, upper airway (UA) surgery, and hypoglossal nerve stimulation. Identifying clinical phenotypes and predictive factors is vital to enable personalized treatment for this complex condition. This Special Issue aims to highlight the recent advances and new perspectives on OSA diagnosis, personalized treatment strategies, and patient follow-up.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
