

Special Issue

Trends in Postharvest Technology and Innovation for Perishable Crops

Message from the Guest Editors

Postharvest loss is a leading cause of food insecurity. Consequently, there is a need for an integrated and innovative approach to reduce the loss in the postharvest system. The prevention and reduction of postharvest loss using novel processing and preservation techniques, engineered systems, biotechnology practices and sustainable packaging ensures sustainable supply, marketing and food security.

This Special Issue aims to cover recent trends and innovations related to postharvest technology, emerging processing and preservation techniques, postharvest pathology, big data analysis, as well as the utilization of biotechnology tools in the food system to minimize postharvest loss. This issue therefore seeks contributions from prospective authors in areas including, but not limited to, emerging technologies to maintain the quality and safety of perishables, recent biocontrol systems to prevent postharvest pathology infections, the application of postharvest omics to understand stress responses, and biosensors and big data analysis to quantify the shelf life of perishable commodities.

Guest Editors

Dr. Zinash A. Belay
Dr. Oluwafemi James Caleb
Dr. Patricia M.K. Mathabe

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
