Pharmacology, Diagnosis and Treatments of Psychiatric Diseases

Message from the Guest Editors

Pharmacology plays a vital role in managing psychiatric disease. Selective serotonin reuptake inhibitors (SSRIs), antipsychotics, mood stabilizers, and anxiolytics are common pharmacologic interventions used to balance neurotransmitter levels and alleviate symptoms. The diagnosis of psychiatric disorders is primarily based on clinical assessments and standardized criteria from the DSM-5 (Diagnostic and Statistical Manual of Mental Disorders) and ICD-10 (International Classification of Diseases), as there are currently no definitive biomarkers for most conditions. Assessment tools help in evaluating symptom severity and guiding treatment plans. Treatments are often multifaceted, combining medication with psychotherapy, cognitive behavioral therapy (CBT), and, in some cases, electroconvulsive therapy (ECT) for treatment-resistant cases. Recent advances in pharmacogenomics and neuroimaging hold promise in the development of more personalized treatment approaches, offering hope for improved patient outcomes in psychiatric care through tailored therapies based on individual genetic and neurobiological profiles.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
