Veterinary Pathology and Veterinary Anatomy: 2nd Edition

Message from the Guest Editors

Veterinary Pathology and Veterinary Anatomy is a Special Issue of Life that focuses on Veterinary Pathology and Anatomy, including various aspects of pathology in domestic and wild animals, such as the following:

New challenges for veterinary pathology in the context of the SARS- CoV2 pandemic;

New challenges for veterinary pathology induced by climate change and the spread of tropical diseases in the northern hemisphere;

Diseases transmissible from animals to humans and from wild to domestic animals and means of prevention;

Diseases caused by industrial toxins, environmental pollution, and mycotoxins;

Epidemiology of non-communicable diseases in relation to environmental pollution.

This Special Issue also focuses on new developments in the diagnosis and treatment of animal diseases. Original manuscripts covering various aspects of veterinary pathology are requested. Papers reporting new solutions to common problems and new descriptions of lesser-recognized conditions are particularly welcome.
