

Special Issue

Epigenetics and Cancer Therapy

Message from the Guest Editors

Cancer is a heterogeneous disease and one of the leading causes of death worldwide, which is affected by genetic and epigenetic modulations in the regulation of cell division. One of the most serious obstacles in applied cancer therapy is the occurrence of multidrug resistance. The phenomenon of multidrug resistance may occur naturally but acquiring it during chemotherapy is more recurrent. Consequently, recent laboratory studies and clinical trials have analyzed remarkable drugs for targeted and personalized therapy; however, the given drug treatment becomes inefficient due to the development of multidrug resistance. We present a Special Issue which will collate papers aimed at identifying genetic markers that influence the outcome of various cancer treatments, including chemotherapy agents, chemoradiotherapy and radiation techniques. We invite papers that underscore the sophisticated treatment approaches as well as the relationships between accumulation of various cancer therapeutic agents and expression levels of target genes, thereby contributing to a better understanding and more effective treatment of cancer or malignant tumours.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
