Special Issue

Non-alcoholic Fatty Liver in Everyday Clinical Practice: From Diagnosis to Therapy

Message from the Guest Editors

Non-alcoholic fatty liver disease (NAFLD) is one of the most common liver diseases encountered in everyday clinical practice. It is a very insidious disease because it often does not cause symptoms and is associated with the risk of life-threatening consequences. So far, there is an interesting discussion related to the mechanisms of development, the choice of tools for diagnosing fatty infiltration of the liver and the therapeutic standards of NAFLD. At the moment, no single marker with a highly sensitive and specific association with the presence of NAFLD has been identified, despite a wide choice (biopsy, imaging, and laboratory tests). Therefore, in the non-invasive diagnosis of this pathology, a number of helpful scales are used, taking into account the patient's sex, age, anthropometric measurements, and selected laboratory parameters. The purpose of our Special Issue is collecting papers, including original and review papers, related to the etiopathogenesis, diagnosis, complications, and treatment of patients with NAFLD based on current medical knowledge. Dr. Kosmalski Marcin

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
