

## Special Issue

# Innovation and Translation in Cardiovascular Interventions—2nd Edition

### Message from the Guest Editor

We are pleased to announce the launch of a Special Issue titled “Innovation and Translation in Cardiovascular Interventions—2nd Edition.” This issue will focus on recent advances that are shaping the field of cardiovascular therapy, spanning the full spectrum from mechanism discovery to application. Cardiovascular interventions continue to evolve rapidly, driven by technological breakthroughs, novel device development, pharmacologic innovation, and improved understanding of pathophysiology. This Special Issue aims to showcase original research, high-quality reviews, and perspective articles that highlight how innovative strategies are improving patient outcomes and translating into practice. We invite contributions on topics including (but not limited to) the following: 1. Image-guided and physiology-guided percutaneous research. 2. Drug–device combinations and bioresorbable platforms. 3. Translational research in cardiovascular science. 4. Novel pharmacologic approaches supporting interventional strategies. 5. Advances in structural heart interventions. 6. Artificial intelligence and digital health applications in interventional cardiology.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
