

Special Issue

Neurotrophic Factors: Their Roles in Disease and Therapeutics

Message from the Guest Editor

This Special Issue will focus on neurotrophic factors, an influential group of neuroregenerative molecules, including neurotrophins, glial cell line neurotrophic factors, and neuroprotective cytokines. These factors are essential to the development of the nervous system and regeneration after an injury. They also play an important role in many diseases, both neurological and non-neurological. This Special Issue will focus on the role of neurotrophic factors in the development, normal function, and disease states of the nervous system, their roles in non-neurological diseases, and potential therapies. Continued understanding of these neurotrophic factors and the ones listed below will improve our understanding of the normal function of the nervous system, as well as disease development and could lead to new therapeutic options.

Guest Editor

Dr. Brian Balog

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
