

Special Issue

Current Trends and Advances in the Diagnosis and Treatment of Gynecological Cancers

Message from the Guest Editor

The aim of the Special Issue is to provide an update in the diagnosis and treatment of ovarian, endometrial, cervical, and vulvar cancers. Invitations are extended to experts and investigators to discuss current histological and molecular classifications of gynecologic cancers and new treatment modalities with targeted treatment options in "original" and "review" papers. The main focus is on the new biomarkers and their clinical utilities in the diagnosis and prognosis of aggressive forms of gynecologic malignancies. Investigations about the precursor lesions of cancers with their molecular results and clinical tests for early detections of gynecological tumors are the priority. Immunotherapy and immunological pathways involved in the pathogenesis of gynecological tumors will be among the discussion points. Genetically inherited cancers/familial cancer types with information from next-generation sequencing are also within the scope of the issue.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
