Special Issue

Skin Technology and Artificial Intelligence in Dermatology

Message from the Guest Editors

This Special Issue explores the integration of Al into various dermatological applications, including teledermatology, personalized skincare, and predictive analytics for skin cancer. It also addresses the ethical considerations and potential biases in Al models. emphasizing the importance of diverse and inclusive datasets to ensure fair healthcare solutions. Additionally, the articles focus on the role of skin technology in continuously monitoring and managing chronic skin conditions, offering insights into future trends and potential challenges. This Special Issue aims to provide a comprehensive overview of the current state and future directions of AI and skin technology in dermatology by bringing together leading experts and researchers. It serves as a valuable resource for dermatologists, researchers, and healthcare professionals dedicated to leveraging technology to improve skin health and patient outcomes.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
