

## Special Issue

# Skin Technology and Artificial Intelligence in Dermatology

### Message from the Guest Editors

This Special Issue explores the integration of AI into various dermatological applications, including teledermatology, personalized skincare, and predictive analytics for skin cancer. It also addresses the ethical considerations and potential biases in AI models, emphasizing the importance of diverse and inclusive datasets to ensure fair healthcare solutions. Additionally, the articles focus on the role of skin technology in continuously monitoring and managing chronic skin conditions, offering insights into future trends and potential challenges. This Special Issue aims to provide a comprehensive overview of the current state and future directions of AI and skin technology in dermatology by bringing together leading experts and researchers. It serves as a valuable resource for dermatologists, researchers, and healthcare professionals dedicated to leveraging technology to improve skin health and patient outcomes.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.
