New Horizons of Adipose Tissue Disorders: From Hormonal Issues to Loose Connective Disease

Message from the Guest Editors

Many years have now passed since the new vision and redefinition of adipose tissue as one of the major endocrine organs and a very important connection network between other endocrine–metabolic systems and other organs and tissues of the organism.

From the data emerging from studies carried out on rare diseases of adipose tissue, lipedema and tissue alterations linked to lymphedema, it is increasingly relevant to consider these diseases as primitive, which could originate from the tissue itself and not always be linked to changes in body weight, hormones or metabolism, and as diseases that do not only involve adipocytes, but the loose connective tissue with the extracellular matrix, other non-adipocyte cells and the entire micro- and macro-vascular and lymphatic systems.

We warmly invite you and your colleagues to submit original research articles, reviews, systematic reviews, meta-analyses and brief reports that address issues related to the future management and understanding of adipose tissue diseases, lipedema and obesity, as well as the evaluation clinical and instrumental diagnosis, treatment, prognosis, follow-up and prevention of these diseases.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
