

Special Issue

Human Infertility and Reproductive Endocrinology

Message from the Guest Editor

Infertility is a common clinical problem. It affects 13% to 15% of couples worldwide. In addition, infertility is also considered a public problem. It does not only affect couples' life, but also healthcare services and the social environment. A male factor is solely responsible in about 20% of infertile couples and contributory in another 30–40%. A female factor is responsible, alone or associated with a male factor, in about 50%. This Special Issue will focus on human fertility and infertility, both at a molecular and clinical level, including hormonal regulation of male and female fertility, diagnosis and treatment of diseases causing infertility, and the clinical management of infertile couples.

Guest Editor

Dr. Giuseppe Grande

Unit of Andrology and Reproductive Medicine, Department of Medicine, University of Padova, Padova, Italy

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
