

Special Issue

Feature Papers in Periprosthetic Joint Infection

Message from the Guest Editors

As is widely known, the treatment of prosthesis joint infections represents a real challenge for patients, healthcare providers and the healthcare system itself, because of the high number of treatment failures and the high economic impact of managing these diseases. A continuous collaboration between orthopaedists and infectivologists should be the cornerstone for optimising the management processes of these infections. At the same time, microbiologists, clinical pharmacologists and pathologists can play a key role in clinical decision making and contribute to the introduction of new methods and techniques.

This Special Issue aims to collect data and experience from clinical and pre-clinical activities arising from the management of patients with bone, joint, periprosthetic or hardware-related infections. Special attention will be paid to the issue of multidisciplinary teamwork and novel approaches in the management of these patients.

Research areas include, but are not limited to, the following: (1).Orthoplastic approach; (2). Artificial intelligence; (3).Diagnosis and management of PJI; (4).Antibiotic therapy in prosthetic joint infections.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
