

## Special Issue

# Natural Compounds in Cancer Therapy–Volume II

### Message from the Guest Editor

Cancer remains the second leading cause of death, and most of the drugs (60%) currently in use for primary prevention of cancer (chemoprevention) are accomplished or inspired by phytochemicals. Therefore, research on natural products is still a valuable approach to compounds with unique structures and mechanisms of action. Some of them, previously not used because of lack of selectivity, have been brought back from oblivion via conjugation with monoclonal antibodies.

Phytochemicals are involved in the prevention and reversal of the carcinogenic process through multiple signal transduction pathways: inhibiting ROS production, NF- $\kappa$ B activation, angiogenesis, AP-1 and COX-2, regulating Stat3 and MAPKs pathways, and inducing cell cycle arrest and apoptosis.

Therefore, there are plenty of opportunities for research in this field.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
