Special Issue

Skin Care and Innovation from the Perspective of Molecular Dermatology

Message from the Guest Editors

This Special Issue aims to underscore the significance of integrative skin biology while addressing the distinct concerns associated with individual skin types. It is dedicated to exploring critical areas requiring a tailored approach to skincare, particularly pigmentation issues, the epidermal barrier, and the superficial dermis, while also examining the effects of environmental factors and ageing on skin health and appearance. Products targeting specific skin types must provide active ingredients that restore the skin's natural functions. Innovation in this field relies on cutting-edge research. particularly in developing formulations that incorporate both natural and repurposed ingredients to target relevant molecular components. We welcome submissions (articles, reviews, perspectives) on skintype-specific biology, biomarkers, genomic data, and novel ingredient studies. We also welcome studies exploring novel ingredients and conducting comprehensive efficacy assessments. Prioritizing innovation is essential for uncovering the molecular mechanisms behind effective skincare solutions.

Guest Editors

Dr. Ewa Markiewicz

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
