Special Issue

Advances in Bioorganic and Medicinal Chemistry

Message from the Guest Editor

The advancement of bioorganic and medicinal chemistry focuses on the development of drug discovery and biological chemistry, particularly the discovery of new therapeutic targets, methods, or agents for the treatment of various diseases. This covers research into novel chemical entities, understanding structure-activity relationships, and using computational techniques in drug design. This issue highlights the impact of bioorganic and medicinal chemistry in the context of new therapeutic strategies in different diseases.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana
Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
