

## Special Issue

# New Advances in Endocrinology and Metabolic Diseases: 2nd Edition

### Message from the Guest Editor

Metabolic diseases are currently on the rise and represent important risk factors for some of the most common and even fatal conditions, such as cardiovascular diseases (CVDs). Hypertension, dyslipidemia, diabetes mellitus, and especially obesity have reached pandemic dimensions. In addition, they are commonly accompanied by dire comorbidities, such as nonalcoholic fatty liver disease (NAFLD), CVDs, and obesity-associated malignancies. Their increasing prevalence represents a major public health burden. This Special Issue is devoted to advances in the understanding of the mechanisms underlying metabolic diseases, the inter-relationship between them, and the progress in the prevention as well as treatment of these conditions. We welcome original research articles, reviews, systematic reviews, and case reports encompassing this area of interest.

---

### Guest Editor

Dr. Chrysoula Boutari

School of Medicine, Aristotle University of Thessalonik, Thessaloniki, Greece

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
